PLANT SCIENCE

Subject index

Volume 103 (1994)

Agrobacterium tumefaciens; Embryonic axis explants; *Helianthus annuus* L.; Meristem transformation; Microprojectile wounding; Transgenic plants **103**, 199

Agrobacterium; Tree transformation; CaMV35S promoter; Overexpression; Anionic peroxidase; Poplar gene **103**, 231

Anionic peroxidase; Tree transformation; *Agrobacterium*; CaMV35S promoter; Overexpression; Poplar gene **103**, 231

Arginine decarboxylase; *Daucus carota*; Carrot; Ethylene; Polyamine; Somatic embryogenesis; *S*-Adenosylmethionine **103**, 223

Artificial seeds; Synthetic seeds; Embryo maturation; Seed dormancy; Seed development **103**, 209

ATPase; *Lycopersicon esculentum* Mill; Salinity; Salt stress; Plasma membrane; Nucleotides **103**, 1

ATPase family; Rice (*Oriza sativa* L.) mRNA; cDNA cloning; HIV Tat binding protein; 26S protease subunit 4 **103**, 33

Bacterial wilt; CHS regulation; Phenylpropane metabolism **103**, 41

Biosynthesis; Photosystem II; Herbicide; DCMU; Electron transport **103**, 155

Brassica; Somatic hybrids; Mitochondrial segregation; Hypocotyl and mesophyll protoplasts; Nuclear ploidy level **103**, 51

Brazil nut; 2S albumin; Promoter; Transient expression; Transgenic plants **103**, 189

Butea monosperma; Leguminosae; *N*-Acetyl galactosamine; Lectin; Hemagglutinin; Plant lectin **103**, 121

Callus determination; Competence; Shoot induction; Shoot organogenesis; Phenocritical events and thin cell layer **103**, 59

CaMV35S promoter; Tree transformation; *Agrobacterium*; Overexpression; Anionic peroxidase; Poplar gene **103**, 231

Carrot; *Daucus carota*; Ethylene; Polyamine; Somatic embryogenesis; Arginine decarboxylase; *S*-Adenosylmethionine **103**, 223

cDNA; Gene expression; Lignin; Peroxidase; *Populus kitakamiensis* **103**, 167

cDNA cloning; Rice (*Oriza sativa* L.) mRNA; HIV Tat binding protein; 26S protease subunit 4; ATPase family **103**, 33

Cell cycle; Flow cytometry; Confocal laser scanning microscopy; Regeneration; Thin cell-layer (TCL) explant; *Nicotiana tabacum* **103**, 81

Cell division; Polarity; Cell elongation **103**, 73

Cell elongation; Polarity; Cell division **103**, 73

Chitinase; Gene activation; Plant resistance; *Puccinia graminis*; *Triticum aestivum* **103**, 177

CHS regulation; Bacterial wilt; Phenylpropane metabolism **103**, 41

Clonal propagation; *Wrightia tomentosa*; Tissue culture; Micropropagation **103**, 67

Competence; Callus determination; Shoot induction; Shoot organogenesis; Phenocritical events and thin cell layer **103**, 59

Confocal laser scanning microscopy; Cell cycle; Flow cytometry; Regeneration; Thin cell-layer (TCL) explant; *Nicotiana tabacum* **103**, 81

Cryopreservation; Forage grasses: fescues and ryegrasses; Embryogenic cell suspensions; Plant regeneration from protoplasts; Randomly amplified polymorphic DNA markers **103**, 93

Cucumis melo; Melonin; RNase; Polynucleotide degradation; RNA degradation; Protein synthesis inhibition **103**, 127

Cyanogenesis; *Sorghum bicolor*; *Linum usitatissimum*; Hydroxynitrile lyase; Immunolocalization **103**, 145

Daucus carota; Carrot; Ethylene; Polyamine; Somatic embryogenesis; Arginine decarboxylase; *S*-Adenosylmethionine **103**, 223

DCMU; Photosystem II; Herbicide; Electron transport; Biosynthesis **103**, 155

Development; *Gossypium hirsutum* L.; Fiber quality; Ovule culture **103**, 107

Electron transport; Photosystem II; Herbicide; DCMU; Biosynthesis **103**, 155

Embryo maturation; Artificial seeds; Synthetic seeds; Seed dormancy; Seed development **103**, 209

Embryogenic cell suspensions; Forage grasses: fescues and ryegrasses; Cryopreservation; Plant regeneration from protoplasts; Randomly amplified polymorphic DNA markers **103**, 93

Embryonic axis explants; *Agrobacterium tumefaciens*; *Helianthus annuus* L.; Meristem transformation; Microprojectile wounding; Transgenic plants **103**, 199

Ethylene; *Daucus carota*; Carrot; Polyamine; Somatic embryogenesis; Arginine decarboxylase; *S*-Adenosylmethionine **103**, 223

Fiber quality; *Gossypium hirsutum* L.; Development; Ovule culture **103**, 107

Flow cytometry; Cell cycle; Confocal laser scanning microscopy; Regeneration; Thin cell-layer (TCL) explant; *Nicotiana tabacum* **103**, 81

Forage grasses: fescues and ryegrasses; Embryogenic cell suspensions; Cryopreservation; Plant regeneration from protoplasts; Randomly amplified polymorphic DNA markers **103**, 93

Gene activation; Chitinase; Plant resistance; *Puccinia graminis*; *Triticum aestivum* **103**, 177

Gene expression; cDNA; Lignin; Peroxidase; *Populus kitakamiensis* **103**, 167

Glycolytic metabolism; *Solanum tuberosum*; Tubers; Sweetening; Sucrose; Starch **103**, 135

***Gossypium hirsutum* L.**; Development; Fiber quality; Ovule culture **103**, 107

Heat shock; Pyrus communis; Pear cells; Protein kinase; Membrane protein phosphorylation **103**, 19

***Helianthus annuus* L.**; *Agrobacterium tumefaciens*; Embryonic axis explants; Meristem transformation; Microprojectile wounding; Transgenic plants **103**, 199

Hemagglutinin; *Butea monosperma*; Leguminosae; *N*-Acetyl galactosamine; Lectin; Plant lectin **103**, 121

Herbicide; Photosystem II; DCMU; Electron transport; Biosynthesis **103**, 155

High performance liquid chromatography; *Solanum tuberosum*; In vitro; Jasmonic acid; Photosynthetic pigments **103**, 11

HIV Tat binding protein; Rice (*Oriza sativa* L.) mRNA; cDNA cloning; 26S protease subunit 4; ATPase family **103**, 33

Hydroxynitrile lyase; *Sorghum bicolor*; *Linum usitatissimum*; Cyanogenesis; Immunolocalization **103**, 145

Hypocotyl and mesophyll protoplasts; *Brassica*; Somatic hybrids; Mitochondrial segregation; Nuclear ploidy level **103**, 51

Immunolocalization; *Sorghum bicolor*; *Linum usitatissimum*; Hydroxynitrile lyase; Cyanogenesis **103**, 145

In vitro; *Solanum tuberosum*; Jasmonic acid; Photosynthetic pigments; High performance liquid chromatography **103**, 11

Inhibitor; *Vigna sinensis* (seeds); Pectin methylesterase; Purification; Kinetics **103**, 115

Intron; Transient expression; Wheat; Promoter; Particle bombardment **103**, 161

Jasmonic acid; *Solanum tuberosum*; In vitro; Photosynthetic pigments; High performance liquid chromatography **103**, 11

Kinetics; *Vigna sinensis* (seeds); Pectin methylesterase; Purification; Inhibitor **103**, 115

Lectin; *Butea monosperma*; Leguminosae; *N*-Acetyl galactosamine; Hemagglutinin; Plant lectn **103**, 121

Leguminosae; *Butea monosperma*; *N*-Acetyl galactosamine; Lectin; Hemagglutinin; Plant lectin **103**, 121

Lignin; cDNA; Gene expression; Peroxidase; *Populus kitakamiensis* **103**, 167

Linum usitatissimum; *Sorghum bicolor*; Hydroxynitrile lyase; Cyanogenesis; Immunolocalization **103**, 145

***Lycopersicon esculentum* Mill**; Salinity; Salt stress; ATPase; Plasma membrane; Nucleotides **103**, 1

Melonin; RNase; Polynucleotide degradation; RNA degradation; Protein synthesis inhibition; *Cucumis melo* **103**, 127

Membrane protein phosphorylation; Pyrus communis; Pear cells; Heat shock; Protein kinase **103**, 19

Meristem transformation; *Agrobacterium tumefaciens*; Embryo-

nic axis explants; *Helianthus annuus* L.; Microprojectile wounding; Transgenic plants **103**, 199

Microprojectile wounding; *Agrobacterium tumefaciens*; Embryonic axis explants; *Helianthus annuus* L.; Meristem transformation; Transgenic plants **103**, 199

Micropropagation; Clonal propagation; *Wrightia tomentosa*; Tissue culture **103**, 67

Mitochondrial segregation; *Brassica*; Somatic hybrids; Hypocotyl and mesophyll protoplasts; Nuclear ploidy level **103**, 51

***N*-Acetyl galactosamine**; *Butea monosperma*; Leguminosae; Lectin; Hemagglutinin; Plant lectin **103**, 121

Nicotiana tabacum; Cell cycle; Flow cytometry; Confocal laser scanning microscopy; Regeneration; Thin cell-layer (TCL) explant **103**, 81

Nuclear ploidy level; *Brassica*; Somatic hybrids; Mitochondrial segregation; Hypocotyl and mesophyll protoplasts **103**, 51

Nucleotides; *Lycopersicon esculentum* Mill; Salinity; Salt stress; ATPase; Plasma membrane **103**, 1

Overexpression; Tree transformation; *Agrobacterium*; CaMV35S promoter; Anionic peroxidase; Poplar gene **103**, 231

Ovule culture; *Gossypium hirsutum* L.; Development; Fiber quality **103**, 107

Particle bombardment; Transient expression; Wheat; Promoter; Intron **103**, 161

Pear cells; Pyrus communis; Heat shock; Protein kinase; Membrane protein phosphorylation **103**, 19

Pectin methylesterase; *Vigna sinensis* (seeds); Purification; Kinetics; Inhibitor **103**, 115

Peroxidase; cDNA; Gene expression; Lignin; *Populus kitakamiensis* **103**, 167

Phenocritical events and thin cell layer; Competence; Callus determination; Shoot induction; Shoot organogenesis **103**, 59

Phenylpropane metabolism; Bacterial wilt; CHS regulation **103**, 41

Photosynthetic pigments; *Solanum tuberosum*; In vitro; Jasmonic acid; High performance liquid chromatography **103**, 11

Photosystem II; Herbicide; DCMU; Electron transport; Biosynthesis **103**, 155

Plant lectin; *Butea monosperma*; Leguminosae; *N*-Acetyl galactosamine; Lectin; Hemagglutinin **103**, 121

Plant regeneration from protoplasts; Forage grasses: fescues and ryegrasses; Embryogenic cell suspensions; Cryopreservation; Randomly amplified polymorphic DNA markers **103**, 93

Plant resistance; Chitinase; Gene activation; *Puccinia graminis*; *Triticum aestivum* **103**, 177

Plasma membrane; *Lycopersicon esculentum* Mill; Salinity; Salt stress; ATPase; Nucleotides **103**, 1

Polarity; Cell division; Cell elongation **103**, 73

Polyamine; *Daucus carota*; Carrot; Ethylene; Somatic embryogenesis; Arginine decarboxylase; *S*-Adenosylmethionine **103**, 223

Polynucleotide degradation; Melonin; RNase; RNA degradation; Protein synthesis inhibition; *Cucumis melo* **103**, 127

Poplar gene; Tree transformation; *Agrobacterium*; CaMV35S promoter; Overexpression; Anionic peroxidase **103**, 231

Populus kitakamiensis; cDNA; Gene expression; Lignin; Peroxidase **103**, 167

Promoter; Brazil nut; 2S albumin; Transient expression; Transgenic plants **103**, 189

Promoter; Transient expression; Wheat; Intron; Particle bombardment **103**, 161

Protein kinase; Pyrus communis; Pear cells; Heat shock; Membrane protein phosphorylation **103**, 19

Protein synthesis inhibition; Melonin; RNase; Polynucleotide degradation; RNA degradation; *Cucumis melo* **103**, 127

Proton pump; Pyrophosphatase; Purification; Solubilization and reconstitution; Tonoplast; *Rubus hispidus* **103**, 25

Puccinia graminis; Chitinase; Gene activation; Plant resistance; *Triticum aestivum* **103**, 177

Purification; *Vigna sinensis* (seeds); Pectin methylesterase; Kinetics; Inhibitor **103**, 115

Purification; Pyrophosphatase; Proton pump; Solubilization and reconstitution; Tonoplast; *Rubus hispidus* **103**, 25

Pyrophosphatase; Proton pump; Purification; Solubilization and reconstitution; Tonoplast; *Rubus hispidus* **103**, 25

Pyrus communis; Pear cells; Heat shock; Protein kinase; Membrane protein phosphorylation **103**, 19

Randomly amplified polymorphic DNA markers; Forage grasses: fescues and ryegrasses; Embryogenic cell suspensions; Cryopreservation; Plant regeneration from protoplasts **103**, 93

Regeneration; Cell cycle; Flow cytometry; Confocal laser scanning microscopy; Thin cell-layer (TCL) explant; *Nicotiana tabacum* **103**, 81

Rice (*Oriza sativa* L.) mRNA; cDNA cloning; HIV Tat binding protein; 26S protease subunit 4; ATPase family **103**, 33

RNA degradation; Melonin; RNase; Polynucleotide degradation; Protein synthesis inhibition; *Cucumis melo* **103**, 127

RNase; Melonin; Polynucleotide degradation; RNA degradation; Protein synthesis inhibition; *Cucumis melo* **103**, 127

Rubus hispidus; Pyrophosphatase; Proton pump; Purification; Solubilization and reconstitution; Tonoplast **103**, 25

2S albumin; Brazil nut; Promoter; Transient expression; Transgenic plants **103**, 189

26S protease subunit 4; Rice (*Oriza sativa* L.) mRNA; cDNA cloning; HIV Tat binding protein; ATPase family **103**, 33

***S*-Adenosylmethionine**; *Daucus carota*; Carrot; Ethylene; Polyamine; Somatic embryogenesis; Arginine decarboxylase **103**, 223

Salinity; *Lycopersicon esculentum* Mill; Salt stress; ATPase; Plasma membrane; Nucleotides **103**, 1

Salt stress; *Lycopersicon esculentum* Mill; Salinity; ATPase; Plasma membrane; Nucleotides **103**, 1

Seed development; Artificial seeds; Synthetic seeds; Embryo maturation; Seed dormancy **103**, 209

Seed dormancy; Artificial seeds; Synthetic seeds; Embryo maturation; Seed development **103**, 209

Shoot induction; Competence; Callus determination; Shoot organogenesis; Phenocritical events and thin cell layer **103**, 59

Shoot organogenesis; Competence; Callus determination; Shoot induction; Phenocritical events and thin cell layer **103**, 59

Solanum tuberosum; In vitro; Jasmonic acid; Photosynthetic pigments; High performance liquid chromatography **103**, 11

Solanum tuberosum; Tubers; Glycolytic metabolism; Sweetening; Sucrose; Starch **103**, 135

Solubilization and reconstitution; Pyrophosphatase; Proton pump; Purification; Tonoplast; *Rubus hispidus* **103**, 25

Somatic embryogenesis; *Daucus carota*; Carrot; Ethylene; Polyamine; Arginine decarboxylase; *S*-Adenosylmethionine **103**, 223

Somatic hybrids; *Brassica*; Mitochondrial segregation; Hypocotyl and mesophyll protoplasts; Nuclear ploidy level **103**, 51

Sorghum bicolor; *Linum usitatissimum*; Hydroxynitrile lyase; Cyanogenesis; Immunolocalization **103**, 145

Starch; *Solanum tuberosum*; Tubers; Glycolytic metabolism; Sweetening; Sucrose **103**, 135

Sucrose; *Solanum tuberosum*; Tubers; Glycolytic metabolism; Sweetening; Starch **103**, 135

Sweetening; *Solanum tuberosum*; Tubers; Glycolytic metabolism; Sucrose; Starch **103**, 135

Synthetic seeds; Artificial seeds; Embryo maturation; Seed dormancy; Seed development **103**, 209

Thin cell-layer (TCL) explant; Cell cycle; Flow cytometry; Confocal laser scanning microscopy; Regeneration; *Nicotiana tabacum* **103**, 81

Tissue culture; Clonal propagation; *Wrightia tomentosa*; Micropropagation **103**, 67

Tonoplast; Pyrophosphatase; Proton pump; Purification; Solubilization and reconstitution; *Rubus hispidus* **103**, 25

Transgenic plants; *Agrobacterium tumefaciens*; Embryonic axis explants; *Helianthus annuus* L.; Meristem transformation; Microprojectile wounding **103**, 199

Transgenic plants; Brazil nut; 2S albumin; Promoter; Transient expression **103**, 189

Transient expression; Brazil nut; 2S albumin; Promoter; Transgenic plants **103**, 189

Transient expression; Wheat; Promoter; Intron; Particle bombardment **103**, 161

Tree transformation; *Agrobacterium*; CaMV35S promoter; Overexpression; Anionic peroxidase; Poplar gene **103**, 231

Triticum aestivum; Chitinase; Gene activation; Plant resistance; *Puccinia graminis* **103**, 177

Tubers; *Solanum tuberosum*; Glycolytic metabolism; Sweetening; Sucrose; Starch **103**, 135

***Vigna sinensis* (seeds)**; Pectin methylesterase; Purification; Kinetics; Inhibitor **103**, 115

Wheat; Transient expression; Promoter; Intron; Particle bombardment **103**, 161

Wrightia tomentosa; Clonal propagation; Tissue culture; Micropropagation **103**, 67
